COMMERCIAL BLENDER

*A perfect blend of power
and versatility.*

Flexibility...

Accommodates a variety of needs — from health care's special diets — to heavy kitchen demands, like salsas, dips, soups, sauces, cocktails, smoothies, margaritas, and more.

Dependability...

Provides enough power and durability to handle the professional demands of hotels, bars, restaurants, hospitals, and nursing homes.

Two Speed Power...

Two speed versatility with pulse option provides precision blending, mixing, chopping — even pureeing of hot and cold foods.

Durable Stainless Steel Blades...

Four stainless steel cutting and mixing blades ensure quick, thorough blending. Special accessory is included for easy blade unit removal.

Full Gallon Container...

Durable stainless steel container features dual metal clamps and handles for extra security during and after blending — clamps hold lid tightly shut; two handles make container easier to grasp and remove from base. A heavy-duty rubber gasket around the lid prevents leakage during usage.

Easy To Service...

Parts and accessories, like our flexible, easy-to-change neoprene clutch assembly, are available for your convenience — a service designed to increase motor life.

Industry's Best Warranty...

A two year warranty provides protection that only the best can offer.
